

Grabek-Global

CONTENTS

INTRODUCTION

For more than a year, we've been growing trees and making forest products that improve lives in fundamental ways. We manage our millions of acres of forests on a continuous and fully sustainable cycle. We are responsible stewards of our land for multiple uses, including recreation, conservation, economic development and different forms of renewable energy. And the wood products we make are used to build homes where families are sheltered and raised.

Our comprehensive infrastructure sets us apart. With our own power plant, vigilant security personnel, a dedicated team, top-tier partnerships, and government backing, we ensure reliability, stability, profitability, and in-still confidence in the future for over 3,122,000 of our valued customers as at 5th of Aug., 2024.

By today GRABEK is the world's largest company operating in the field of mining and creating its own investment infrastructure. The product line already has 3 working projects: cloud mining, ASIC mining, investment portfolios.

Established in 2023, Grabek-Global has been at the forefront of cryptocurrency cloud mining in recent days. Our mission is to make cloud mining straightforward, convenient, and accessible to all users. We have built a world-class cloud computing platform, employing cutting-edge deployment technology to cater to a diverse user base. With Grabek-Global, you can mine cryptocurrencies from anywhere in the world. Our primary aim is to democratise access to cryptocurrency cloud mining, regardless of an individual's initial investment, experience, or technical expertise. We provide the opportunity to mine cryptocurrencies such as Bitcoin, Ethereum, and Litecoin etc using equipment housed in our data centers and those of our partners. Our team of experienced specialists handles equipment maintenance and customer support, ensuring a secure and reliable service. By using the most efficient hardware, we enhance mining performance while offering some of the most competitive cloud mining plans available on the market.

"This is not for us, not for our children but for our grandchildren"

~ Luc Georges

(Founder Grabek-Global in 2022)

ACHIEVING YOUR FINANCIAL GOALS WITH GRABEK-GLOBAL

Grabek data center is located on the territory of Hrazdan thermal power plant. To date, it has more than 20,000 devices and supports an energy infrastructure of 60 MW, capable of expansion to 200 MW. The location in Hrazdan creates a number of significant advantages, such as: direct receipt of electricity from thermal power plant, ideal climatic conditions and the presence of its own service center. Armed guards monitor the safety and security of the equipment around the clock, and a team of engineers working on the site 24/7 ensures uninterrupted operation.

- **Investment security**

We are committed to the principles of mutual transparency and trustworthiness because we believe open partnerships are essential to achieving outstanding results. By promoting trust and transparency, we aim to provide stable and fair returns to all parties involved.

First and foremost, we prioritize reputation and results, ensuring that every Grabek-Global partner has the opportunity to engage with us on a long-term basis with specific security guarantees.

- **Account protection**

The Grabek-Global platform provides online services globally, and we place great emphasis on ensuring the digital security of our partners' accounts. Protecting digital assets is one of our main and top security priorities.

Additionally, to prevent unauthorized access to your account, we offer a 2FA (Two-Factor Authentication) authorization system. We highly recommend using the additional security feature in your Grabek-Global account.

- **Investment contract**

We, as Grabek-Global LTD, guarantee your investments safety in legal terms when concluding an investment agreement with you. The investment agreement implies that both parties legally carry out obligations.

We ensure that from our side we fulfill the obligations on investment terms and within the time frames provided by marketing of our company. Therefore, you as an investor, undertake to use the Grabek-Global platform in accordance with the terms and conditions of our company.

Grabek-Global complies fully with its obligations to investors provided by marketing of the company. The investment agreement with Grabek-Global is your additional legal guarantee.

OUR CORE BUSINESSES

Forestry Business

Trees and working forests are remarkable resources that, when managed responsibly, can meet a wide range of fundamental needs for people and the planet for generations to come. For more than a century, we have been proving it is possible to harvest and replant on a continuous cycle to both maximize value for our shareholders and ensure that our forests continue to thrive, forever.

Trees and working forests are remarkable resources that, when managed responsibly, can meet a wide range of fundamental needs for people and the planet for generations to come. For more than a century, we have been proving it is possible to harvest and replant on a continuous cycle to both maximize value for our shareholders and ensure that our forests continue to thrive, forever.

In the United States, we are responsible stewards of 10.5 million acres of productive timberlands we own or manage. Our forests spread across the western U.S., northern U.S. and southern U.S., and in Canada we collaboratively manage millions more acres of publicly owned land under long-term licenses.

Mining Business

The Grabek mining farm is equipped with state-of-the-art hardware and employs cutting-edge technologies to ensure efficient mining operations. The facility uses high-performance ASIC (Application-Specific Integrated Circuit) machines, which are specially designed for mining cryptocurrencies like Bitcoin. These machines offer significantly higher hash rates and energy efficiency compared to conventional computing hardware, allowing Grabek to maximize its profitability while keeping operational costs down. Moreover, the mining farm employs innovative cooling solutions and automated management systems to ensure that its equipment operates at peak performance without overheating, a common issue in large-scale mining operations.

**OUR PRICING
RATES AND AFFILIATE
STRUCTURE**

Grabek-Global, with its unique real-time adjustment mechanism for mining hashrate prices and a globally distributed hashrate scheduling system, adeptly addresses market coin price fluctuations and changes in mining difficulty. This ensures the stability of mining output. Its hashrate scheduling system maintains a high online rate of global mining hashrate, consistently above 95%, providing our clients with a reliable and efficient investment experience In the Digital Mining Sector.

Mission

G-G powers a very innovative and sustainable blockchain infrastructure.

Integrity

We put trust at the forefront of everything we do – from working with investors, to stakeholders and community members. We are transparent and take a holistic and values-based approach to decision-making.

Innovation

We are committed to engineering with ingenuity and to evolving business models for sustainability. From our investments in Argo Labs to providing open-source IP, we are constantly looking for better ways to create value for all our stakeholders

Agility

Our team and network are global and robust, allowing us to pivot and respond to changes in our operating context and carve a path as climate-oriented leaders.

Resiliency

We take a holistic view of our industry and our team. By focusing on our mission, empowering our team, focusing on balance and mindfulness, we are able to survive shocks and thrive in a world of uncertainty.

Investment Highlights

- Backed By Industry Pioneers
- Privileged Access to Mining Resources Through a Key Partnership With BITMAIN
- Proprietary Developed System Handling Ultra-Large Scale Hashrate Management and Dispatching
- Efficient And Consistent Operations Across Strategically Located Facilities
- Comprehensive Mining-as-a-Service Covering Bespoke Hashrate Solutions and Hosting Services
